

SERVING THE
FINANCE SECTOR

Serving The Finance Sector

The world runs and relies on it. This sector is a lynchpin of the economy, and the backbone upon which business depends.

Our work with large financial clients has given us an insight on their culture, expectations, and especially the immense breadth of their technology needs.

We work to accelerate their complex digital transformations in ways that emphasize security and complete compatibility with existing systems.

None of that would be possible without our intimate knowledge of what's now, and what's next in technology. Add to it our expertise and experience and the conclusion is obvious: **Cofomo**.

Cofomo, Long-Term Partner of The Financial Sector

Cofomo's teams, steadfast allies of technology and business, have a keen grasp of all the professions within the finance and insurance sectors. Over the years, they've acquired an extensive knowledge of their culture, services, processes, and business and technology solutions.

Property and casualty insurance

Challenges And Initiatives in The Financial Sector

Providing and maintaining a quality customer experience in a highly competitive market has become one of the main challenges pushing banking institutions to put customer experience and innovation at the heart of their development strategy.

Offering daily banking services on a self-serve basis, allowing for the opening of accounts and the use of online services with a high level of security while maintaining proximity with clients are representative of the initiatives institutions hope to integrate into their digital transformation. Because of these business challenges, organizations must also continuously adapt often highly complex technology environments in parallel with their existing systems.

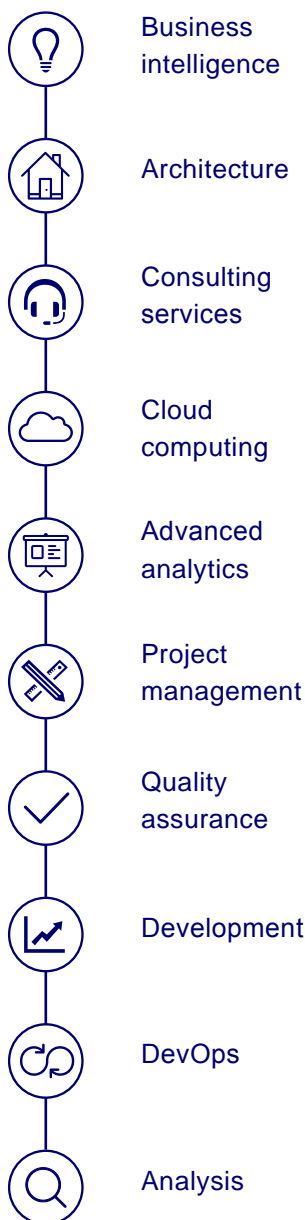

Among Cofomo's clients' important technological projects are:

- system modernization and application portfolio optimization (software rewriting, agile development, etc.);
- cloud architectures based on application programming interfaces (APIs);
- IT security (vulnerability management, multi-factor authentication, cryptography, sensitive data management, etc.);
- data and megadata management.

Expertise In Agility and In Digital Transformation Acceleration

To overcome these challenges, Cofomo has developed a wide range of IT expertise to provide support to its customers in their transformation projects.

Cofomo's consultants are working on large-

scale projects aimed at accelerating the achievement of its financial sector clients' business objectives.

Here are some examples:

- Consulting services
- Fixed-price squads
- Distributed squads
- Development centers
- Integrated management

A.

Modernization
of legacy systems
and applications

B.

Development
squads (Java, .Net, BI,
microservices, API)

C.

Low-code platforms,
CMS (ServiceNow,
Mendix, Sitecore,
Drupal, etc.)

D.

Development
of web and mobile
interfaces and
applications

E.

Data
management
(Snowflake,
Denodo, etc.)

F.

Regulatory
compliance
(data protection,
IFRS17, etc.)

G.

Process
optimization
and operational
efficiency

H.

Security
and DevSecOps

ABOUT COFOMO

Established in 1995, Cofomo is a Canadian leader in information technology (IT) and business consulting services, which translates today into the acceleration of client companies' digital transformation.

Its solutions cover the full range of business needs, including strategy, innovation, agility, intelligence, security, and cloud computing.

Its unique expertise is delivered through flexible on-demand project and talent delivery models.

A team of over 3,000 professionals provides these services to large private and public sector organizations, mostly located in Eastern Canada. This team is supported by a high-performance, lean organization and a state-of-the-art digital ecosystem to communicate with clients, acquire and manage talents and projects, and deliver the full services of the new digital economy.
